React
Mocha
Jest
Express
React Native

LIBRARIES

Chai
Spies
Socket.io
Redux

TOOLS

Node.js
Git
Github

ACCOMPLISHMENTS

Student Body Leadership

IAN HOLLADAY

FRONT END DEVELOPER

ABOUT

I am a Front End Software Engineer, with a passion for problem solving. I love learning new technologies along with writing clean code and advancing my understanding of programming theories and best practices.

PROJECTS

Rancid Tomatillos   Repository   Deployed
I worked on a paired project to design a site that consumes movie data from APIs to display information and allow users to login and rate movies themselves.
- JSX, React, SASS, Mocha, Jest

BangWords   Repository   Deployed
I worked with a team to build an application that allows for multiple players to take chances at guessing a user generated word. I added the ability for users to chat through socket.io.
- JSX, SASS, React, Mocha, Jest, Express, Socket.io

Never Alone   Repository
I built an application that allows people to check in on one another while being minimally invasive.
- ReactNative, Expo, Babel, Ruby, GraphQL

EXPERIENCE

Front End Developer
Turing School of Software & Design: 05/2020 - Present
- 7 month, 1500 hr, accredited program
- Focus: Front End Web Development
- Learned theories and best practices (TDD, Big-O, Accessibility, Responsive Web Design, etc)

Type 2IA Wild-Land Firefighter
Alaska Fire Services: 04/2019 - 08/2019
- First responder to large scale natural disasters
- Worked with highly effective team to mitigate disaster

Bartender
Bear Tooth Grill: 09/2016 - 05/2019
- Worked in fast-paced customer oriented restaurant to deliver quality food, beverage, and customer service
